

EGS Automation presents itself together with Dunkermotoren at the MOTEK trade fair in Stuttgart

In the past, Dunkermotoren and EGS Automation, both part of the AMETEK Advanced Motion Solutions group, each had their own booths at the MOTEK fair in Stuttgart. Since 2021, EGS Automation is part of Dunkermotoren, so that both companies can now present themselves together at trade fairs. This will also be the case at the MOTEK trade fair. In **Hall 7** at **Booth 7218**, the robotics specialist and the drive technology manufacturer will present their joint solutions from **October 04-07, 2022**.

One of the highlights will be the joint developments towards IIoT solutions. Dunkermotoren's IIoT brand nexofox not only develops services and tools for the smart motors of the BG **dPro** series, but also for the systems of EGS Automation. In this regard, a production line digitized by nexofox will be presented at the booth. Simple and smart integration - this is what EGS customers can look forward to in the future.

Another highlight demonstrating the cooperation between EGS Automation and Dunkermotoren is the integration of smart motors into EGS Automation systems. This will be presented at the MOTEK trade fair on a real machine. There, a SUMO Duplex with a Yaskawa GP 7 robot will be shown, which will find its use in the production of Dunkermotoren in the future. At the trade show, the manufacturing cell will be used for automatic placement of an assembly and joining process - specifically, for joining a shaft to a gear. Motors from Dunkermotoren are of course also installed - the smart motor BG 95x40 **dPro** with integrated PROFINET interface is used at the joining device, a BG 45x30 MI in the feeding system for the shafts.

Look forward to the new joint strength of the two companies in Hall 7 at Booth 7218.
