Experience the Automation of Tomorrow

EGS Automation's Metalworking Solutions at AMB in Stuttgart

The AMB in Stuttgart is the place to be for manufacturers of technologies, innovations, and services in metalworking. In 2024, EGS Automation, a brand of AMETEK, will also be exhibiting, showcasing new automation solutions for metalworking processes from September 10 - 14, in **Hall 6, Stand 6B45**.

As a world premiere, EGS will introduce the new SUMO Easyplex at AMB. This is a handling system belonging to the SUMO Standard Automation Systems, making the loading and unloading of your machine easier than ever before!

The Easyplex can store individual workpieces of various sizes and geometries. With a footprint of just 1.9 square meters, it is particularly compact. Additionally, its mobile design allows for easy repositioning, ensuring full accessibility to your machine. Another special feature is its DIY setup and operation, making the Easyplex the simplest and most cost-effective solution for your entry into automation. The convenient EGS Smart Pad operator panel enables intuitive setup and operation of the system without programming knowledge, providing full control over all relevant data and recipes for the system.

As another highlight at the show, the digital brand nexofox will present its smart IIoT solutions. With software features like remote monitoring and predictive maintenance, every system operates more efficiently, making your production ready for the industry of tomorrow. Convince yourself at our booth!

AMETEK, Inc. is a leading global provider of industrial technology solutions serving a diverse set of attractive niche markets with annual sales over \$7.0 billion.
